Cultural Program

Welcome to Barcellona Pozzo di Gotto, welcome to Sicilyl We are happy to see you here and hope you will enjoy the beauties the region has to offer. Sicily is the largest island in the Mediterranean Sea and it is an autonomous region of Italy. The island is a mixture of Greek, Roman, Arabic and Norman influences which can be seen in its unique architecture. Symbolically, Sicily means "the land of fertility".

Typical for the region is also its Mediterranean climate. Due to a deforestation which has taken place since Roman times, decline of rainfall and drying of rivers is very characteristic. From the administrative point of view, Sicily is divided into nine provinces, with Province of Messina being one of them. This mountainous territory has a lot to offer and Barcellona Pozzo di Gotto is one of the examples.

In this brochure, we would like to give you a brief overview of the places you can visit in Sicily. They are many and is is not easy to make a choice where to go first. For this reason, use these little items to help you orientate and find what fits you most. Buon viaggio!

Parco Jalari half day - 5 hours

The Park Museum "Jalari" is situated on the Peloritan mountains a few kilometres from Barcellona Pozzo di Gotto (ME) extended over 35 hectares (350,000 msq). Unlike traditional museums, "Jalari's" 15,000 (fifteen thousand) finds are placed in the 42 artisan shops with the aim to recreate faithfully the atmosphere and life of long time ago; in fact, they are positioned in their presumed original locations throughout the thousands of shops that once animated and filled the neighbourhoods.

with cultural and artistic refreshment. Parco Jalari is the place for you to visit!

Along the avenues, hundreds of stone sculptures and fountains sculpted by Prof. Mariano Pietrini, accompany the visitors throughout a journey that brings them to discover their own identity, from a state of "Confusion" (name given to the first avenue) to that of "Dreams" (name of the avenue that concludes the journey), passing by the other avenues, through other states of the human mind: "Reflection", "Rediscovery of Values", "Pain", "Love", "Creativity"...

All the time you can enjoy spectacular views of the coastline as well as the pink flowers growing along the way you go. In the 20th century, the town has become a colony of artists, writers and intelectuals.

than food there is the view of Etna and the bay.

Places to see:

Taormina is situated on the ancient site on a lofty hill which is about 250 metres above the sea. The most remarkable site is its Ancient Theatre, Teatro Antico di Taormina, being one of the most celebrated ruins in Sicily. Built in the seventh century BC, it is one of the most amazing monuments remaining in the town. Built of brick, with a diameter of 120 metres, this theatre is the second largest of its kind in Europe, being just second after Syracuse. The site was carved out of the rock on the Mount Tauro. Around 5000 spectators fit in. However, the extensive use of brick in the theatre suggests a Roman influence and researches feel that the Romans most likely rebuilt the theatre over the original Greek foundation. While the theatre is most often referred to as the Teatro Greco because of its Greek origins, it is also referred to as the Greco-Roman Theatre because of its Roman renovation.

Places to see:

Lipari is the largest of the islands as well as it is the name of the main town. Lipari consists of four main villages: **Pianoconte**, **Quattropani**, **Acquacalda** and **Canneto**.
